

Advice on using the ‘cpexposed’ Archives

Introduction

The aim of the Archives is to provide documentary evidence of Common Purpose’s activities. By nature the organisation is secretive and operates in the shadows. They do not want ordinary people to know what they are really up to, especially the direction from high level government and corporate power elites, including the International Bankers. Meetings are held under Chatham House rules, and agendas, minutes and information, particularly from the CP Advisory Groups are withheld from the general public. CP ‘graduates’ do not normally declare themselves to non CP trained colleagues, or even to friends. Common Purpose is currently working very hard to stop, block and obfuscate those people who are legitimately asking for information on CP. We have many examples where CP individuals are lying, or deliberately misleading those seeking the truth. Why should that be?

Against this background, real factual documentary evidence of CP’s activities is very important. Quality evidence is required to “take the lid off” CP’s subversive effect in our society. We must dig deep and on a broad front. “Oh I’ve checked their website and I can’t see anything wrong” is the sort of attitude we must overcome. CP is an elitest controlling political organisation. It is up to no good and we need to expose it to the light. These Archives are designed to help the researcher expose more of CP’s activities, to help inform those with a general interest, and to convince those still uncertain, that at the very least, large amounts of public money are being squandered on this pro-EU political charity.

Categories

The Archives are divided into a number of categories such as Media, Police, Military, NHS, Prisons and Education for example. Common Purpose has also heavily targeted the ‘Regional bodies’ such as Regional Development Agencies, Government Offices of the Regions and their myriad of associated Quangos and Quango Charities. Most of these are within the ‘soft sectors’ of community empowerment, social work, sex education, gay, lesbian and transsexual rights, Black and Minority Ethnic rights, CREATIVE dance and drama etc. All these areas will be covered by the appropriate category, which will contain relevant documents, letters and emails for example. The nature of the ‘soft sectors’ can also be seen from the lists of graduates names.

Where a category is prefixed with CP, it indicates that the category is generally focused on Common Purpose itself.

CP Finances shows documents related to the huge sums of public money that CP takes from the public sector for course and events. The evidence shows that many authorities have little or no control, and or detailed accounting for money expended on CP. Many refuse to disclose their expenditure. Some lie to cover their involvement.

CP Key Documents contains information showing CP controlling and influencing public authorities and officers. It also shows how CP is defaming members of the public who are legitimately asking public authorities for information on their expenditure on CP. We are right wing, extremist, or mentally unbalanced in some way.

CP Graduates Lists show names of CP trained people across the UK. This section is still being completed, as there are some 23,000 trained CP graduates in UK alone. Please be patient as we upload new lists.

CP EU data is designed to show the links between CP and the EU. CP is highly pro-EU and is helping to promote the EU wherever it operates, including amongst school children.

CP Penetration UK shows a map of CP's penetration across UK, including Northern Ireland. We recommend this as a starting point to get a visual picture of the extent of CP's activity.

CP Mind Techniques will provide a database of the training techniques used by CP to 're-frame' individuals to conform with the new elitest Common Purpose political agenda.

Cities

Wherever possible information is linked to the City to which the CP activity relates. Where more than one city is involved, the major city is used. Counties are used where the data is specifically county related, or covers a large number of county based areas. Although CP does operate in rural areas – Suffolk for example, the highest concentrations are within the major cities and urban areas. London is riddled with CP chosen 'leaders'.

Country

Although CP started in UK, it has since spread to the Commonwealth Countries and Europe. UK CP cells are now being linked with those in Europe, and as CP itself states, "Our networks will soon be very important". The CP system is also to be found in USA although in a different form. We are already researching the USA and value the contacts and helpers we have already made there. Other countries will be added in due course.

EU Soviet

The creation of an EU Soviet state is happening before our eyes. The creation of elitest unelected Common Purpose leaders fuelled by Marxist and Fabian Socialist 'think-tanks' is a key part of the implementation of that state within the UK. The EU (Supranational Soviet) category will provide evidence of CP's place in that plan.

Inevitably some information will be split across categories and will require some searching of the lists.

I hope that you will dig deep and will become one of the 'truth seekers' that we so badly need if we are to expose and unseat Common Purpose. Remember the young men and women of our Armed Forces are fighting and dying to protect the United Kingdom. We have the task of fighting an equally dangerous 'enemy within'.

Thank you for your help and support.
